

Adding Value to Your Business

The Diamond Innovations Labeling Program

The Diamond Innovations Labeling Program – A Sign of Superior Quality & Performance

Adding Value to Your Tools

Diamond Innovations continues to lead the superabrasive industry by developing new products, coatings and applications. As a valued customer you can take advantage of this leadership and our worldwide reputation by participating in the Diamond Innovations Labeling Program: An unmistakable sign of superior quality and performance.

Diamond Innovations is recognized as the industry leader, and will continue to enhance that leadership through Six Sigma based manufacturing and engineering. Our “Commitment to Quality” assures that abrasives manufactured by Diamond Innovations will always be recognized as the standard for excellence and productivity.

The Labeling Program is a vital part of our “Sharing the Opportunity” philosophy, which reflects a partnership with customers and end users around the world to create higher levels of quality and productivity.

Adding Value Without Adding Cost

The Labeling Program is very easy to implement. You simply agree to affix the Diamond Innovations label to the fabricated tools which contain 100% abrasives manufactured by Diamond Innovations. The sign is indeed a valuable asset, which you can leverage for competitive advantage.

As a leading supplier of diamond tools, you found a winner in the Diamond Innovations Labeling Program. Labeling is one key way to differentiate between your high quality products and low-cost, low-quality tools. Labeling your products allows your company to immediately benefit from the Diamond Innovations name. The sale of your tools can continue to increase despite economic slowdowns.

When your customers see this label, they will be reassured that the superabrasive contained in your product is of the very highest quality, and that they will achieve the maximum level of productivity.
