

Environmental, Health and Safety policy

Diamond Innovations is a worldwide leader in the manufacturing of superabrasive of products. We are committed to maintaining world-class EHS programs.

Continual Improvement

- Environment, health and safety issues are integral parts of Diamond Innovations' total operations and the company achieves continual improvement in these areas through management by objectives. Diamond Innovations believes that the greatest effect is achieved through preventive actions.

Sustainable Development

- The company follows an approach that results in long-term sustainable development in its operations. Consequently, Diamond Innovations strives for high efficiency in the use of energy and natural resources, promotes systems for recycling and recovery of materials and works to prevent pollution and any work-related illness and injury.

Healthy and Safe Working Conditions

- Diamond Innovations strives to provide a healthy and safe work environment that stimulates employees to perform effectively, to assume responsibility and to continue to develop towards their personal and professional goals.

Legal Compliance

- Diamond Innovations complies with or exceeds applicable environmental, health and safety legal and other requirements. The company believes that common and effective environment, health and safety requirements and standards should be established at an international level.

This policy is the responsibility of all Diamond Innovations associates and is made freely available to the public.
